DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of claims 1-21 in the reply filed on 4/27/06 is acknowledged. The traversal is on the ground(s) that the species are not distinct and independent and also examiner fail to show different classification and different field of search. This is not found persuasive because claims 1-21 pertains to a welding equipment search in class 219 and process and claims 22-23 pertains to a method of refilling of gas search in class 141.

The requirement is still deemed proper and is therefore made FINAL.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-21 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-28 of U.S. Patent No. 6,977,358. Although the

Art Unit: 1725

conflicting claims are not identical, they are not patentably distinct from each other because US '358 disclose a welding apparatus comprising an enclosure, a power source, and a gas cylinder disposed internally and another gas cylinder disposes externally.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2, 3, 8, 17, 18, and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 83 08 99.3.

As to claim 1, DE '99.3 discloses an enclosure, a power source (8 is a control panel having power source) within enclosure, a shielding gas regulator (5) connected with first gas source (7) within an enclosure.

As to claim 2, the first gas is a gas cylinder connecting to a regulator.

As to claim 3, the gas is disposable.

As to claim 8, a valve (6) attached to the shielding gas regulator (5) and adjustable within the housing.

As to claim 17, the method comprising the steps of providing a power source, providing a regulator, and enclosing a power source and the regulator in an enclosure.

Art Unit: 1725

As to claim 18, passing the welding gas through an opening in the enclosure and into engagement with the regulator.

As to claim 21, extending one of the valve and a gauge to the regulator through the enclosure to allow visual inspection.

Allowable Subject Matter

6. Claims 4-7, 9-16, 19 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
